RESEARCH INTERESTS

As an amateur portrait photographer, I love to capture every moment of beauty, but I am more curious about how people perceive and appreciate beauty. Therefore, my current research is mainly focused on how people perceive the attractiveness of an individual face and a group of faces. I would like to use more techniques to explore how people perceive the world through my Ph.D. study.

EDUCATION

09/2019-
Expected 06/2022 **Sun Yat-sen University**, Guangzhou, China
M.S. Candidate in Psychology

09/2014-06/2018 **South China University of Technology**, Guangzhou, China
LL.B. in Intellectual Property
B.Eng. in Computer Science & Technology (Second Degree)

RESEARCH EXPERIENCE

09/2019-Present **Postgraduate research,** Face Lab, Sun Yat-sen University
Supervisor: Dr. Guomei Zhou
Manage the equipment of our lab. Produce dynamic Asian face materials. Manage and contribute to five projects under the supervision of Dr. Guomei Zhou. These projects are mainly focused on the following questions:
Question 1: How do people make summary statistics of facial attractiveness in the context of multiple social groups? (Zheng & Zhou, in preparation)
- Skills: *Psychophysical methods*, *MATLAB*, *JavaScript*

Question 2: Are dynamic faces more attractive than static ones, and what is its underlying mechanism? (Zheng & Zhou, ready to submit; Zhou & Zheng, in preparation)
- Skills: *Classical behavioral experimental paradigms, MATLAB, E-Prime*

Question 3: How does facial normality affect facial attractiveness? (Zheng et al., 2021)
- Skills: *Structural equation modeling*

Question 4: How does attention modulate the ensemble perception of faces? (Collecting data)
- Skills: *MOT paradigm*, *MATLAB*

JOURNAL ARTICLES

1. **Zheng, R.**, Ren, D., Xia, C., Pan, J., & Zhou, G. (2021). Normality mediates the effect of symmetry on facial attractiveness. *Acta Psychologica, 217,* 103311. doi:10.1016/j.actpsy.2021.103311

MANUSCRIPTS

1. **Zheng, R.**, & Zhou, G. (ready to submit). Spirit behind appearance: Facial motion increased facial attractiveness through perceived vitality.
2. **Zheng, R.**, & Zhou, G. (in preparation). My group is more important than yours: Cheerleader effect in multiple social groups.
3. Zhou, G., & **Zheng, R.** (in preparation). The representation of static facial attractiveness and the attractiveness enhancement mechanism of dynamic faces and group faces. In Chinese.

CONFERENCE PRESENTATIONS

1. **Zheng, R.**, Ren, D., Xie, C., Pan, J., & Zhou, G. (2021). Normality mediates the effect of symmetry on facial attractiveness. Oral presented at the International Joint Forum of Psychological and Cognitive Sciences, Peking University, 04/25/21, Online.
2. **Zheng, R.**, & Zhou, G. (2021). Vitality makes dynamic faces more attractive than static faces. Poster presented at the annual meeting of the Vision Sciences Society, 05/24/21, Online.

ACADEMIC SKILLS

Data Collection:	Matlab, E-prime, PsychoPy, JavaScript
Data Analysis:	SPSS, Matlab, Mplus, JASP, Python
Graphics:	Matlab, GraphPad, FantaMorph, Photoshop
Video Editing:	Premiere, AfterEffect
Language:	Mandarin (Native), English (Fluent, IELTS: 7.0)

TRAINING

07/2021 **Neuromatch Academy 2021**
Completed the interactive track and the course project of NMA-Computational Neuroscience

PROJECT

01/2021-12/2024 National Natural Science Foundation of China (32071048).
"The representation of static facial attractiveness and the attractiveness enhancement mechanism of dynamic faces and group faces." (PI: Dr. Guomei Zhou)

- **Principle Member**
- Contributions: Conceived and designed experiments; Programmed, collected data, and analyzed data; Assisted in writing the grant proposal; Assisted with supervising undergraduate students.

01/2018-12/2021 National Natural Science Foundation of China (31771208).
"Recognition of dynamic faces with different movement patterns: The role of holistic processing, attention, and experience." (PI: Dr. Guomei Zhou)

- **Principle Member**
- Contributions: Conceived and designed experiments; Programmed, collected data, and analyzed data; Assisted in supervising undergraduate students.

HONORS & AWARDS

2021	First Prize Scholarship, Sun Yat-sen University
2021	Excellent Oral Presentation Award, International Joint Forum of Psychological and Cognitive Sciences, Peking University
2020	Second Prize Scholarship, Sun Yat-sen University
2019	Second Prize Scholarship, Sun Yat-sen University
2017	Excellent Student Cadre, South China University of Technology
2016	Advanced Individual of Social Work, South China University of Technology
2016	Merit Student, South China University of Technology
2015	Third Prize Scholarship, South China University of Technology

TEACHING EXPERIENCE

09/2021-01/2022	**Teaching Assistant**, Sun Yat-sen University Experimental Psychology-Lab
03/2021-07/2021	**Teaching Assistant**, Sun Yat-sen University Industrial and Organizational Psychology
06/2017-09/2017	**Volunteer Teacher**, The Lighthouse Volunteer Project, Guangzhou, China Carried out photography training and psychological education for migrant children in urban villages
