RESEARCH INTERESTS

As an amateur portrait photographer, I love to capture every moment of beauty, but I am more curious about how people perceive and appreciate beauty. Therefore, my current research is mainly focused on how people perceive the attractiveness of an individual face and a group of faces.

EDUCATION

Sun Yat-sen University 09.2019 – Expected 06.2022

M.S. Candidate in Psychology

Supervisor: Dr. Guomei Zhou

South China University of Technology 09.2014 – 06.2018

LL.B. in Intellectual Property

B.Eng. in Computer Science & Technology (Second Degree)

RESEARCH EXPERIENCE

Graduate research, Face Lab, Sun Yat-sen University 09.2019 – Present

Supervisor: Dr. Guomei Zhou

Manage five projects which mainly focus on:

- How do people make summary statistics of facial attractiveness in the context of multiple social groups? (Zheng & Zhou, in preparation)
  Skills: Psychophysical methods, eye-tracking
- Are dynamic faces more attractive than static ones, and what is its underlying mechanism? (Zheng, et al., submitted; Zhou et al., accepted)
  Skills: Classical behavioral experimental paradigms
- How does facial normality affect facial attractiveness? (Zheng et al., 2021)
  Skills: Structural equation modeling
- How does attention modulate the ensemble perception of faces? (Collecting data)
  Skills: MOT paradigm

PUBLICATIONS

JOURNAL ARTICLES

Zheng, R., Ren, D., Xie, C., Pan, J., & Zhou, G. (2021). Normality mediates the effect of symmetry on facial attractiveness. *Acta Psychologica, 217*, 103311. doi:10.1016/j.actpsy.2021.103311

MANUSCRIPTS

Zhou, G., **Zheng, R.**, Lin, J., & Liu, X. (accepted). The representation of static facial attractiveness and the attractiveness enhancement mechanism of dynamic faces. In Chinese.

Zheng, R., Yang, B., & Zhou, G. (submitted). Spirit behind appearance: Facial motion increased facial attractiveness through perceived vitality.

Zheng, R., & Zhou, G. (in preparation). My group is more important than yours: Cheerleader effect in multiple social groups.

Yang, B., **Zheng, R.**, & Zhou, G. (in preparation). Social binding of dyad faces did not improve paired face recognition but impaired individual face recognition.

CONFERENCE PRESENTATIONS

Zheng, R., & Zhou, G. (2021). Vitality makes dynamic faces more attractive than static faces. Poster presented at the annual meeting of the Vision Sciences Society, 05/24/21, Online.

Zheng, R., Ren, D., Xie, C., Pan, J., & Zhou, G. (2021). Normality mediates the effect of symmetry on facial attractiveness. Oral presented at the International Joint Forum of Psychological and Cognitive Sciences, Peking University, 04/25/21, Online.

ACADEMIC SKILLS

Programming: MATLAB, E-prime, PsychoPy, jsPsych

Analysis: SPSS, JASP, Mplus, Python

Language: Chinese (Native), English (Fluent, IELTS: 7.0)

TRAINING

Neuromatch Academy 07.2021

Completed the interactive track and the course project of NMA-Computational Neuroscience

HONORS & AWARDS

Excellent Oral Presentation Award 2021

International Joint Forum of Psychological and Cognitive Sciences

First Prize Scholarship 2021

Sun Yat-sen University

Second Prize Scholarship 2020

Sun Yat-sen University

Second Prize Scholarship 2019

Sun Yat-sen University

Excellent Student Cadre 2017

South China University of Technology

Advanced Individual of Social Work 2016
